Karen,

The MSDS wasn't attached. Are you asking if it's typical that they create their own MSDS when they blend the products?

Joan, is this a typical practice?

It is a Freedom MSDS. They mixed two Dow products.

Can't access it on BB. Is it a Freedom MSDS or is Dow?

Good morning,

During the 10am meeting with Freedom Industries this morning we were told that there was a mixture in Tank 396, instead of just MCHM. The mixture was approximately 5.6% of the PPH which can be found in the attached MSDS sheet from published by Freedom Industries. The PPH is a combination of the two products from DOW which are also attached to this email. Approximately 300 gallons of the PPH with 6251 gallons of MCHM for the total release (including what is still in the soil and what made it to the river).

Thanks,

Melissa Linden

Subject: MSDS for PPH

Hello,

Attached, please find the three MSDS for the PPH.

Thanks,
